

Engine Module Exchange & Support Solutions

Salus Aviation's U.S. facility maintains an extensive rotating exchange pool of more than 200 engine modules, supporting operators with flexible, rapid, and reliable powerplant solutions. Our modules are available for exchange, outright purchase, engine swaps, or full engine builds. Lead times vary based on stock levels, work in progress, and customer delivery requirements. Modules may also be reserved up to six months in advance to minimize aircraft downtime.

For quotes, availability, or technical support, contact our U.S.-based sales team at SalesUSA@SalusAviation.com.

**Log cards are required for all exchange pricing to support accurate core evaluation and discounted pricing for life-limited components. **

Available Arriel Engines

Model	Part Number	Availability
